

MainPhos

Mainphos is a Mainfert range of near pH neutral sustained release products.

Mainfert has worked with independent manufacturers to develop a fertiliser that meets modern requirements for non-soluble phosphate and sulphur applications. As with all Mainfert nutrient solutions, the Mainphos range is adaptable to your system for capital, maintenance, regenerative or biological farming, the Mainphos range is adaptable to all.

Available for granular blends and fine particle fertiliser.

Key benefits:

- Sustained phosphate availability
- High calcium
- Low nutrient leaching and fixation potential
- Low solubility to reduce runoff and leaching
- Low cadmium and other heavy metal levels
- Other elements blended as required

Mainphos product range:

Product	N	P	S	Ca
Mainphos 18	0	18	0	24

- Granulated Dicalcium Phosphate
- Ideal for pasture capital and maintenance requirements. Drilling grade available.

Mainphos XP	11	17	1	10
--------------------	-----------	-----------	----------	-----------

- Blend of Dicalcium Phosphate, guano Phosphate and DAP
- Ideal for pasture capital and maintenance requirements when Nitrogen is also required

Mainphos 16C	0	16	0	23	Mo and Humate
---------------------	----------	-----------	----------	-----------	----------------------

- Dicalcium Phosphate based product with added Carbon and Molybdenum
- Ideal for pasture capital and maintenance requirements. Mo to increase clover

Mainphos XPC	10	16	1	9	Mo and Humate
---------------------	-----------	-----------	----------	----------	----------------------

- Blend of Dicalcium Phosphate, guano Phosphate and DAP with added Carbon and Molybdenum
- Ideal for pasture capital and maintenance requirements when Nitrogen is also required

Mainphos 10	0	10	0	26
--------------------	----------	-----------	----------	-----------

- Guano Phosphate. Natural form of Phosphate

MainCalci P	0	6	14	73
--------------------	----------	----------	-----------	-----------

- Blend of Mainphos 16, Elemental Sulphur and Aglime*
- Ideal for pasture maintenance where there is Calcium deficiency, especially on hill country

MainCalci XP	0	10	14	70
---------------------	----------	-----------	-----------	-----------

- Blend of Mainphos 16, Elemental Sulphur and Aglime*
- Ideal for pasture maintenance where there is Calcium deficiency, especially on hill country

*Available at Springfield, Mt Somers and Weston lime works
